Pacific Ventilation Circular Inline Duct Fans

NOW AVAILABLE AT KIRBY

MFP Series

Featuring a wide range of capabilities it is excellent for supply and exhaust, well suited for projects that have medium ventilation demand and/or tight spaces.

- ✓ Versatile: MFP can be mounted at any angle using the included mounting plate.
- ✓ Fast and easy maintenance: The case unclips from the duct connections for easy access.
- ✓ Key features include: Economic product, supply & exhaust capable and low noise level. Suitable for bathrooms, kitchens, apartments, shops, and cafes.

MFS Series

The MFS is ideally suited for applications where silent fans are needed as well as high pressure and airflow.

- ✓ Motor: AC motor available for selection.
- ✓ Key features include: Low noise level, Polymer-coated steel case, compatible with round air ducts.
- ✓ Suitable for libraries, conference facilities, universities, or schools.

PMF Series

The PMF inline fan range is fitted with mixed-flow impellers driven by long-life motors with sealed-for-life bearings.

- ✓ All PMF fans are fitted with flex leads and plugs.
- ✓ Key features include: Exceptionally quiet, On-board speed control potentiometer, easy motor/impeller dismount system and cost-effective.
- ✓ Suitable for external 0-10VDC analogue signal for speed control.
