KIRBY DEFENDER® ECOCOOL

CO₂ Evaporators

Innovative Features, Real Benefits

All models within the Kirby Defender® Ecocool range are rated for a maximum working pressure up to 80 Bar, making them suitable for both transcritical and subcritical applications.

EBM fans feature advanced blade technology to optimise air volumes and flow properties, and improved noise ratings, whilst offering maintenance free use.

Pre-wired fans simplifies installation and speeds up commissioning.

Premium aluminum construction with a crisp, white powder coated finish is durable, easy to clean and provides an aesthetically pleasing appearance.

User friendly access panels are designed for ease of commissioning and service, with front opening access to both electrical and refrigeration components.

Dual side drain pan provides flexibility when selecting installation locations while making maintenance quick and easy.

Future Proof, Environmentally Friendly Performance

With a very low global warming potential (GWP) base value of 1, R744 is an environmentally friendly alternative to synthetic refrigerants. Naturally occurring, it is non-toxic (within a ventilated space), non-flammable and non-ozone depleting. Furthermore, not only does it provide exceptional performance, your investment is future proof for years to come.

Kirby Defender® Ecocool CO₂ Evaporators – Nomenclature

KD	MS	C	A	1	017	-RC
Fan Type & Size A 300mm (AC)				Additional Functionality -RC Ready Connect -E Defrost Heater (medium temperature only)		
Fluid Type C CO ₂				Nominal Capacity - Watts/100 (rounded up or down) 017 - 1700W CO ₂ Models - R744		
Usage Application MS Medium Temperature – Standard				Number of Fans 1 - 4 Fans		
Product Brand KD Kirby Defender®
