

# coolcard™

## Membership Recognition

Present your card at any of our branches and be instantly recognised as a Coolcard preferred customer. Your account details will come up automatically, correct the first time.

## Reduced Transaction Time

Coolcard will deliver quicker purchase turnaround with less time spent at the counter. Your technicians will be easily identified and be able to get what they need and be on their way with minimum fuss.

## Secure Transactions

At your request, we can 'lock' your trading account to Coolcard Only, which means that no one can use your account unless you have authorised them as a cardholder. Cards are password protected and can be cancelled instantly at any time to prevent fraudulent purchases.

## Easy Administration

You are in complete control of your Coolcards, via the Smart@ccess Customer Portal. Create, modify and edit cards as required, and for customers with multiple trading accounts easily edit which accounts the cardholder is able to transact on.

## Transaction Tracking

A Kirby Coolcard™ is easy and secure account identification along with a direct allocation of refrigerant cylinders to your technicians in the Gas2Go App and Smart@ccess Portal.

We store your Coolcard identification with your order. When you view your Account Summary in our Smart@ccess Customer Portal, you can easily identify which employees placed the order, reducing the need needing to check internal records or match PO numbers.

## Get Started Today

Log into the Smart@ccess Customer Portal and register your employees for Coolcards.

Digital cards are instantly assigned to your technicians and activated online, with confidence that you cancel a card immediately upon staff changes, blocking access to your trading accounts. Digital Coolcards can be added to Klarna/Stocard or stored in your Apple wallet.

Physical cards are optionally available during the card creation process and will be mailed out to you.
